HELPING BUSINESS & INDUSTRY ACHIEVE

PROJECT MANAGEMENT EXCELLENCE SINCE 1991

PROVEN PERFORMANCE

ON COMPLEX, BUSINESS-CRITICAL PROJECTS

SINCE 1991, PMCC has provided project management training, expert project consulting and assessment to Fortune 500 companies and organizations that include the oil, gas and their support industries, power and utility, governmental agencies, shipyards and the construction industries, to cite just a few.

PMCC has established a highly successful record assisting our clients with challenging projects including:

- *Upstream and downstream oil field projects*
- *Construction of pipelines along the U.S. Gulf Coast and in Africa*
- *Constructing mine-hunters, roll-on/roll-off vessels, LCACs, tugboats, pipe lay barges, jackets, decks, caissons, tension leg platforms, and compliant towers*
- *IT and telecommunication projects ranging from installing mobile technology on utility trucks to a corporate-wide initiative updating the Windows operating system on 12,000 computers located in five states*

PMCC's professional team of skilled project leaders and trainers are assisting manufacturers of products ranging from valves to plastic goods, and in the production of engineered products.

We've taught project management techniques for the Corps of Engineers, U.S. Department of Defense, and numerous federal, state and local governments. We are assisting international construction companies to improve the performance of their projects from the Middle East to the Gulf Coast.

WHAT MAKES PMCC DIFFERENT?

PMCC HAS BUILT A REPUTATION for delivering significant, bottom-line ROI for each and every client. Not only will we help you successfully complete initiatives and projects to meet your strategic objectives but often we can save millions of dollars in operational and process costs.

1 KNOWLEDGE & EXPERIENCE More than 16 years providing training, consulting and assessment to the world's leading companies in the oil, gas and their support industries, power and utility, governmental agencies, shipyards and the construction industries.

Working side by side with our clients, our trainers and consultants have experienced the challenges faced in these industries and the disciplines needed to manage projects successfully.

2 CONTINUOUS LEARNING PMCC is a PMI Global Registered Education Provider (REP). PMCC courses are based on the widely accepted industry standard, "Guide to The Project Management Body of Knowledge (PMBOK®)."

Each course is developed from real world experience ensuring our training, mentoring and coaching provides your staff with the latest project management tools, techniques and best practices they can immediately apply in their day-to-day assignments.

3 FLEXIBILITY & QUALITY PMCC's roots are deeply entrenched in best practices. Our consulting, training, and assessment services undergo rigorous, ongoing review to reflect the latest best practices as well as our clients' changing needs.

4 BOTTOM-LINE RESULTS PMCC works directly with our clients sharing timelines, goals, and objectives. Your success is our success. From our "Results Driven Project Management Principles" class to our consulting and OPM3 assessments, PMCC provides significant and meaningful bottom-line return on investment to each and every client.

Some Project Highlights

■ PMCC played an integral part in the Entergy Transmission award-winning "Mississippi River Crossing Project" nicknamed "High

Tech Under the Big Muddy" with PMCC's Milt Jones, PMP, acting as the Project's Construction Manager. The Project was awarded the prestigious 2004 "Project Of The Year" award at the PMI Chapter level and garnered another "Project Of The Year" award from the New Orleans Business Roundtable. The project was also submitted by the local Chapter as a contestant in the international PMI "Project Of The Year" competition where it advanced to the "finalist" ranks.

■ PMCC provided consulting and training services to a company that received the tri-service (Army, Navy, and Air Force) certification of their project management systems.

■ Developed and delivered a PM training program worldwide for a Fortune 500 company with operations in North America, Europe, and South America.

■ Developed and delivered custom training courses on Contracts, Contracting strategies, and Project negotiations for one of the largest engineering companies in the energy sector.

■ Planned, scheduled, monitored and analyzed progress on a fourteen-week outage for the largest outage at a major fossil fuel plant in South Louisiana.

TRAINING

*PMCC's
Training Builds
Knowledge, Skill
& Competency*

PMCC OFFERS A FULL CURRICULUM

of more than seventy-four world-class courses available in convenient locations throughout the year. Additionally, we

provide customized training to meet your specific needs as well as industry-specific training material.

Our exclusive three-level approach takes into account the experience, knowledge and skill of participants.

PMCC COURSE LEVELS

Level One • Knowledge

Level Two • Skill

Level Three • Competence

PMCC'S KNOWLEDGE COURSES

These courses provide attendees with a sound understanding of project management principles and best practices. Knowledge courses range from half-day sessions to full-week courses.

PMCC'S SKILL COURSES

Our "Skill" courses are designed for people with general knowledge of project management principles and best practices who seek specific instruction for implementing the practices in their organization.

A number of PMCC 2-day workshops (e.g. earned value, project planning, project negotiation, risk management) are focused on providing basic skills and practice for the attendees.

PMCC'S COMPETENCE COURSES

PMCC competence courses address top-level project management applications such as managing a portfolio of projects, program management and establishing and operating an effective Project Management Office (PMO). These courses are designed for practicing project managers and team members having an overall understanding of project management methodology and knowledge of the common project management "language."

PMCC SPECIALIZED SOFTWARE COURSES

Our software-related courses provide attendees with the basic skill sets that enable them to plan and report on projects.

- **Microsoft Training** Our status as "Microsoft Partner" together with our depth of experience in project management has enabled us to develop custom and customizable courses for the family of Microsoft 2003 and 2007 products.

Course attendees learn how to employ Microsoft Project Standard, Professional and Server to plan, execute, analyze and forecast the results of your projects.

- **Project Simulations** Project simulations are fun and practical. They are excellent tools for team building and for project teams set to initiate or plan an upcoming project.

Here, attendees are immersed in a project scenario via our proprietary simulation software that responds to the decisions and choices they make as they progress through a project's life cycle.

Reviews of the choices made during the simulation are used as "learning opportunities," demonstrating the challenges project teams face in applying project management best practices.

PMCC: A LEADING EDUCATION PROVIDER

PMCC has helped thousands of project managers in hundreds of organizations achieve excellence at the individual and corporate levels in planning, managing and completing their projects successfully.

Our training programs undergo rigorous, ongoing review and are updated to reflect the latest best practices as well as our clients' changing needs.

PMCC is a Project Management Institute (PMI) Globally Chartered

Registered Education Provider (REP). All PMCC courses incorporate the "Guide to The Project Management Body of Knowledge (PMBOK® Guide)" and the ISO criteria for "Best Practice Project Management," standards.

CONSULTING

PMCC CONSULTANTS ARE EXPERT at assisting clients in designing and implementing proven processes that integrate the scope, cost, schedule, change management, and project risks.

Our highly skilled consultants can serve as advisors, monitor project progress and create custom programs tailored to your specific needs. Most frequently we're called to work side-by-side with your management, becoming part of your team, sharing goals, objectives and timelines.

How PMCC's Consultants Will Benefit Your Organization

- Project management facilitation, coaching or mentoring your team
- Assist with establishing a central Project Management Office (PMO) or Project Management Resource Center (PMRC)
- Provide advice, periodic audits and monitoring of project deliverables, ensuring the correct methodology is consistently employed and that selected processes enhance the progress of your project in the most cost effective manner
- Ensure your organization's alignment conforms with widely accepted industry "best practice" processes and procedures addressing project risk, cost reporting, forecasting, progress of your project and assuring cost-effective scheduling
- Develop and facilitate interactive planning sessions that involve all members of your project teams. These sessions are often used to identify the tasks and steps needed to reach a major project milestone.

ASSESSMENT

PMCC IS ASSISTING ORGANIZATIONS worldwide by providing assessments of individual projects and portfolios of projects.

PMCC's assessment service is a powerful tool that will provide you with the insight needed for guiding your organization to attain optimal project, program and portfolio management structure.

We identify project vulnerabilities and give you actionable solutions. We assess the systems, processes, and procedures used in your organization as well as staff competency and, when required, recommendations for additional support

- Individual 360-degree skill assessment

- Training curricula focused on results employing role-play, exercises and simulation where applicable
- Organization evaluations
- Coaching
- Mentoring

Our consultants are richly experienced in managing business-critical projects and they are certified to implement both the PMI "Organizational Project Management Maturity Model" (OPM3) and PMCC's proprietary Project Management Maturity Model.

PMCC's assessment gives you a prioritized improvement plan with recommendations to ensure your project management operations are in compliance with your strategic corporate goals and vision.

Our experienced, industry-savvy professionals are providing assessments for projects worldwide, from the Arabian Gulf to the Gulf of Thailand and Gulf of Mexico.

Call or email us at PMCC — we can help you achieve maximum results for your projects.
